PROJECTS

The Smart HealthCare :

Using NetBeans, Java and MYSQL, We have developed an application i.e. Mobile base application. This application will help the patient to consult with doctor through the online without going to medical as well as doctor can prescribe about the medicine through the online and in this application online payment also available. So that it takes less time consumption.

Goods and Services Management System :

Using VS code, Flutter and Dart we are going to build an application i.e. based on the mobile application. The purpose of the application is to help in transportation and in this application, the e-challan and address of locations are present which is why it takes less time for one trip.
